

SUMMARY

Cybersecurity professional with 15+ years spanning IT operations, security operations, and enterprise security program leadership. Currently leads enterprise vulnerability management across converged IT and OT environments for a regional electric utility, translating compliance frameworks into measurable protection for critical infrastructure. Deep experience in incident response, threat intelligence, and security control assessment, paired with a track record of building programs from scratch and mentoring the analysts who run them. CISSP, CISA, and CISM certified with 200+ hours of annual continuing education.

CORE COMPETENCIES

Vulnerability Management (IT/OT) · Risk-Based Prioritization & KEV Escalation · Incident Response & Threat Hunting · Cyber Threat Intelligence · OT/ICS Security · NIST SP 800-53 · Security Control Assessment · Security Policy & Standards Development · Security Monitoring & Detection · Digital Forensics · Business Continuity & Disaster Recovery · Cloud & SaaS Security · Identity & Productivity Platform Administration · Vendor & Supply-Chain Risk · Cross-Functional Program Leadership · Analyst Mentorship

PROFESSIONAL EXPERIENCE

Hawaiian Electric

Honolulu, HI

Electric utility serving a multi-island service territory

Senior Information Assurance Analyst

Jan 2025 – Present

- Lead enterprise vulnerability management across IT and OT environments, owning remediation tracking, risk-based prioritization, and escalation of known-exploited vulnerabilities.
- Coordinate rapid response to high-severity vulnerabilities and supply-chain incidents, delivering threat intelligence briefings that drive executive decision-making.
- Founded and lead a recurring OT/ICS vulnerability management maturity forum, establishing durable collaboration across IT, OT, and Operations teams that previously worked in isolation.
- Perform cybersecurity assessments of systems and networks, identifying deviations from policy, secure configuration baselines, and NIST SP 800-53 controls.
- Develop and enforce cybersecurity policies, standards, and procedures governing IT, OT, and cloud-hosted environments.
- Provide consulting-level security control requirements for enterprise projects, grid modernization technologies, and third-party SaaS integrations.
- Support business continuity and disaster recovery planning, and serve on the organization's cybersecurity incident management program, including on-call rotation.
- Mentor junior analysts and cybersecurity interns; represent the organization in the local security community through ISC2, ISACA, and DEF CON.

Security Operations Analyst

Oct 2023 – Jan 2025

- Monitored, tuned, and maintained enterprise security monitoring and detection platforms across IT and OT environments in a multi-island utility environment.
- Conducted incident response and mitigation for security events spanning both IT and OT networks.
- Performed proactive threat hunts and forensic investigations targeting advanced persistent threats and insider risk.
- Produced and presented threat intelligence sourced from public, private, and government channels including CISA, FBI, and sector ISACs.
- Partnered with system owners to track, remediate, and validate vulnerabilities against defined SLAs and compliance requirements.

Relocated to Honolulu, HI in 2022 for spouse's career opportunity.

REDiTECH

Omaha, NE / San Antonio, TX

Managed service provider supporting hundreds of SMB and enterprise clients

Cyber Security / Business Continuity Engineer

Feb 2021 – Feb 2022

- Built and led the company's first proactive security and backup team, serving as the owner of both service lines from design through delivery.
- Triaged, investigated, and mitigated security incidents surfaced across a multi-tenant client base of endpoint, mobile, and email security platforms.
- Implemented, administered, and regularly tested multi-vendor backup systems; executed business continuity and disaster recovery operations during live emergencies.
- Advised the sales organization on scoping custom security and backup solutions, directly enabling new revenue.

Senior Server and Network Administrator

Sep 2016 – Feb 2021

- Resolved escalated server and network incidents handed up from lower-tier administrators.
- Administered and hardened enterprise directory services and productivity platform environments across the client portfolio.
- Led account takeover and malware response engagements, working hands-on with affected end users.

System Administrator, Technical Support

Jul 2014 – Sep 2016

- Provided support desk and onsite technical services to hundreds of managed service clients across desktops, servers, networking equipment, directory services, and a broad range of professional software suites.

P&L Technology

Omaha, NE

Field Service Technician

May 2013 – Jul 2014

- Delivered onsite hardware support and sales; supported implementation engineers on large-scale PC refresh projects.

Early Career: Global Customer Operations Representative, LinkedIn (2012–2013); additional customer operations and sales roles (2004–2009).

CERTIFICATIONS

Security & Governance: CISSP, (ISC)² · CISM, ISACA · CISA, ISACA · OffSec Incident Responder (OSIR) · Blue Team Level 1 (BTL1)

OT/ICS & Cloud: OT/ICS Security Platform Certified User · AWS Certified Cloud Practitioner · AWS Certified AI Practitioner

Additional: Professional Scrum Master I · Practical OSINT Research Professional (PORP) · Linux Essentials · MCSA: Windows Server 2012

200+ hours of continuing education annually · 20+ additional courses and micro-certifications in OT/ICS security, threat intelligence, cloud security, and OSINT (CISA, TryHackMe, Hack The Box)

EDUCATION

B.A., Business Management, Bellevue University | **A.S., Network Systems Technology,** Nebraska College of Business

PROFESSIONAL AFFILIATIONS & COMMUNITY

ISC2 (2023–present) · ISACA (2025–present) · AFCEA International (2025–present)

DEF CON: Volunteer shepherd, Packet Hacking Village, active in local DEF CON community groups · Active participant in local ISC2 chapter meetings
